Professional Summary

I have a total of 7.4 years of experience.

4 Years 4 Months (4.4 Yrs) of experience in Teamcenter PLM

- Teamcenter Support and Administration
- Teamcenter Installation
- Integration Knowledge of AutoCAD, NX, Vertex

3 Years of total experience in Mendix Infra level support, AWS, Kubernete, Azure Devops, AWS Aurora PostgreSQL

- Proficient in AWS and Azure cloud platforms
- CICD Tools – Microsoft Azure, Jenkins, GitHub
- Mendix Application Configuration and Deployment activity support
- Database – AWS Aurora PostgreSQL, MySQL , Oracle.

Teamcenter Application Administration:

- Knowledge of Organization structure in Teamcenter Engineering.
- Working knowledge of WorkFlow designer/Viewer
- To create customized searches for objects in Teamcenter database using Query Builder.
- To Use Engineering Change Management (to EPR, ECR, ECN)
- To define and maintain projects.
- To create/modify Revision and Variant rule to product structure using structure
- Working Experience in using Teamcenter (PLM) for data/Ownership transfer
- Working with Content management,Multistructure manager.
- Data Model Deploying Activity

Devops Engg (Mendix Infra level support):

- Implemented and managed AWS infrastructure to ensure high availability and scalability for Mendix low code application.
- Managed AWS resources,including EC2 instances, API Gateway, S3 bucket.
- Mendix version upgrade activity.
- Managed and maintained Azure DevOps pipelines for automated builds, tests, and deployments.
- Managed and optimized CI/CD pipelines with Jenkins, significantly reducing release cycle times and enhancing overall development efficiency.

Achievements and Certifications:

- Rising Star award for “**Extensive effort in migration planning and delivery. Exemplary performance in managing end users expectation. Suhas was a top recipient of customer appreciations for two**

Suhas Kalyanrao Patil

consecutive months. Big achievement even with the low ticket volume in PLM area” at Konecranes and Demag pvt ltd.

- Strong experience of working on PLM projects with globally distributed teams

User Level (My Teamcenter, Workflow, Change Management, Structure Manager, Multi- Structure Manager)

| | | | | S.E. | 61.06 |
| Computer Technology (Diploma) | MSBTE | Yashwanrao Chavan Institute of Polytechnic, Beed. | June-2013 | 68.26 | |
| 10 th | Maharashtra State Sec. & High. Sec. Education Bord | YogeshwariNutanVidhyalay, Ambajogai. | May-2010 | 80.73 | |

Project Profile: 1

Organization – HCL Tech (May 2022 – Current Working)

Role – Senior Software Engineer

Client – DSM- Firmenich Pvt Ltd

Service Type – Mendix Infra level support, Kubernete, AWS RDS, AWS, Microsoft Azure Devops

Responsibilities :

- Implemented and managed AWS infrastructure to ensure high availability and scalability for Mendix low code application.
- Managed AWS resources,including EC2 instances,S3 bucket, RDS, ECR, Cloudwatch.
- Managed all maintenance, upgrades, instance type changes, and other activities for AWS RDS, while also conducting prompt monitoring of RDS.
- Mendix version upgrade activity.
- Mendix Configuration changes.
- Manage and upgrade Kubernete (EKS) version.
- Manage all Mendix application deployments, pods, and implement configuration changes through Kubernetes services.
- Manage and maintain Azure DevOps pipelines for automated builds, tests, and deployments.
- Manage and optimized CI/CD pipelines with Azure Devops, significantly reducing release cycle times and enhancing overall development efficiency.
- Developed and maintained infrastructure as code (IaC) using Kubernete for efficient provisioning.
- Good Hands-on experience Jenkins CI/CD Pipeline.
- Worked on GIT and GIT HUB, created branches, GitHub access management.
- Collaborated with development teams to optimize application performance in the cloud environment.

Suhas Kalyanrao Patil

- Collaborated with the team to migrate critical workloads to AWS, configuring VPC components, EC2 instances, and leveraging kubernetes, Azure Devops, CDK for infrastructure as code (IaC).
- Created Validation Documents, Runbooks and Design Documents for Cloud Foundation, CI/CD pipeline enhancement, AWS Aurora PostgreSQK RDS upgrade, Kubernetes Upgrade.
- Implemented Mendix deployment in Azure DevOps to Dev/QA/Production environments.
- Monitored deployment and build issues that may occur.
- Supported developers with their testing setup by providing DB backup also restore process.
- Monitored and maintained system health, ensuring proactive issue resolution.

Project Profile: 2

Organization - Fujitsu India Pvt Ltd (Nov 2021 – May 2022)

Role - Associate Application Development

Client - Nissan Motor Co. Ltd.

Service Type – Teamcenter - Global Support, CAD - Global Support

Responsibilities :

- Application server monitoring
- Teamcenter workflow, access related issue resolutions, Dispatcher related issue, dataset attach
- Teamcenter license monitoring
- Extracting data of users (Active / Inactive)
- JBOSS Password change
- NX, Vertex, TC user license assigning
- Monitoring Stuck Workflows

Project Profile: 3

Organization - Konecranes & Demag Pvt Ltd (Feb 2018 – Nov 2021)

Role - Consultant – PLM & Alfresco AMS

Service Type - Teamcenter-Global Support : CAD, Aton, Alfresco Global Support

Responsibilities :

- Operations support includes Teamcenter support and issue resolutions.
- Application monitoring and maintenance of existing applications.
- Coordinating with application users and support teams for ticket resolution.
- Teamcenter workflow, access related issue resolutions, Dispatcher related issue, Bulk item creation, ownership change, classification, dataset attach, status apply through staging table.
- Deployment related activities.
- Teamcenter, Multistructure manager, Content management license related issue
- SAP, Aton, Alfresco integration related issue.
- Created SQL queries for Aton PDM systems.
- Teamcenter monthly release activity.
- Teamcenter to SAP/Aton/Alfresco/Store data transfer issues resolution.
- Teamcenter license management.
- Custom functionality configuration with preferences.
- Data migration from legacy system(Aton) to Teamcenter.
- Teamcenter / Aton / Alfresco services stop and start.
